PROFESSIONAL PROFILE

GIS and spatial database specialist with **19+ years** across geospatial delivery, enterprise data platforms and automation in energy and infrastructure. Hold a **Master's in GIS** and **B.Tech in Geology**, with experience in **ArcGIS Enterprise and Online, PostgreSQL/PostGIS, Python and AWS**. Administered mission-critical spatial databases with **99.9% uptime** and improved query performance by **50%**. Combine secure Web GIS architecture, role-based access, spatial ETL and data governance with multidisciplinary team leadership to support reliable enterprise GIS solutions.

SELECTED RELEVANT ACHIEVEMENTS

- **Database reliability & performance:** migrated and administered PostgreSQL/PostGIS systems with **99.9% uptime**; optimised spatial SQL and indexing to improve query performance by **50%**.
- **Secure GIS architecture:** architected a Web GIS platform for **20,641+ assets across 23 data layers**, integrating PostGIS and REST APIs with role-based access and single sign-on.
- **Workflow automation:** automated spatial data integration and processing with **Python, ArcPy, GeoPandas and FME**, reducing manual effort by **67%** and strengthening data quality.
- **Enterprise delivery:** led and mentored **8 GIS professionals**, aligning GIS delivery standards, database management and stakeholder requirements across concurrent programmes.

CORE TECHNICAL CAPABILITIES

GIS platforms & applications: ArcGIS Enterprise, ArcGIS Online, ArcGIS Pro, ArcGIS Dashboards, Survey123, QGIS; Web GIS and REST API integration

Spatial databases: PostgreSQL/PostGIS administration and migration, spatial SQL, indexing, query optimisation; Oracle Spatial

Scripting & ETL: Python, ArcPy, GeoPandas, Pandas, Shapely, SQL, FME; spatial data modelling, cloud ETL and data warehousing

Security & data governance: role-based access, single sign-on, data quality assurance, topology validation and enterprise spatial data governance

Cloud & delivery: AWS (S3, EC2, RDS), Docker, Git/GitHub, CI/CD; technical leadership, Agile delivery and staff training

PROFESSIONAL EXPERIENCE

GIS COORDINATOR | Nov 2017 - Present

Ikeja Electric | Lagos, Nigeria

- Govern network, asset, customer and operational data in PostgreSQL/PostGIS for a **3,800+ km electricity distribution grid serving 1M+ customers**, maintaining an enterprise platform for spatial analysis.
- Integrated SCADA, billing and field-capture data using automated **Python (ArcPy, GeoPandas)** and FME pipelines, reducing manual processing by **67%** and improving data quality and repeatability.
- Architected and led delivery of a secure Web GIS platform for **20,641+ assets across 23 data layers**, combining Next.js, TypeScript, PostGIS and REST APIs with role-based access and single sign-on.
- Translated outage data into real-time ArcGIS dashboards for executive and operational decisions, reducing mean incident-response time by **40%**.
- Digitised **8,513+ field inspections** with Survey123 and integrated GIS outputs into Power BI and real-time KPI platforms, accelerating capture by **45%** and eliminating paper-based errors.

GIS / DATA ENGINEERING MANAGER | Sep 2016 - Oct 2017

PoloSoft Technologies | Lagos, Nigeria

- Led **8 GIS professionals** across concurrent Agile project streams, establishing delivery standards and delivering enterprise geospatial solutions for utility and infrastructure clients across West Africa.
- Designed scalable cloud-based spatial ETL and data-warehousing pipelines for large-volume processing; used Power BI and Tableau to communicate spatial and operational results to stakeholders.
- Mentored staff through structured training in GIS technologies and database management, improving delivery consistency and technical quality.

GIS / DATABASE SPECIALIST | Oct 2012 - Aug 2016

SpatialMatrix Ltd | Lagos, Nigeria

- Migrated and administered PostgreSQL/PostGIS systems for oil and gas and infrastructure clients, sustaining **99.9% uptime** across mission-critical environments.
- Optimised complex spatial SQL queries and indexing strategies, improving geospatial query performance by **50%** and enabling more efficient spatial analysis.
- Translated raw spatial data into interactive dashboards, analytical outputs and cartographic products, communicating results in a form clients could use for decisions.

GEOLOGIST | Jun 2010 - Aug 2012

Earth-Source Hydrocarbon | Nigeria

- Led geological surveys and GPS-based collection for hydrocarbon exploration, producing analysis-ready datasets for resource estimation and prospect appraisal.
- Built structural and stratigraphic maps in ArcGIS that guided drilling-target selection and reserve evaluation.

GIS TECHNICIAN | Jan 2005 - May 2010

Spatial Technologies Limited | Nigeria

- Built spatial ETL workflows for ingestion, transformation and quality assurance, supporting reliable analysis-ready dataset delivery.
- Performed network, proximity and spatial-modelling analyses; managed GPS/GNSS collection, post-processing, migration and topology validation for large-scale mapping.

EDUCATION & PROFESSIONAL DEVELOPMENT

Master's, Geographic Information Systems | University of Lagos, Nigeria

Bachelor of Technology (B.Tech), Geology | Federal University of Technology, Owerri, Nigeria

Edureka | 2024: Data Science & Machine Learning; Deep Learning; Python & SQL for Data Science; Tableau for Data Visualization

UrBizEdge | 2022: Big Data Analysis, Power Query, Power Pivot & VBA | **In progress:** GISP Certification (GISCI)

ADDITIONAL TECHNICAL TOOLKIT

Engineering: Docker, Git/GitHub, CI/CD, Next.js, TypeScript, Oracle Spatial | **Analytics & visualisation:** R, Power BI, Tableau, Plotly, ArcGIS Dashboards | **Field data:** Survey123, GPS/GNSS capture, topology validation
