PROFESSIONAL SUMMARY

Database and GIS Administrator with 19+ years safeguarding the **integrity, security, governance, and accessibility** of geological, spatial, and operational datasets across the utility, oil & gas, and geoscience sectors. Geologist by training (**B.Tech in Geology; Master's in GIS**) with field exploration experience — geological surveys, structural and stratigraphic mapping, and GPS/GNSS data capture supporting drilling-target selection and resource estimation. Administer enterprise geodatabases (**PostgreSQL/PostGIS**, SQL Server, Oracle Spatial), sustaining PostgreSQL/PostGIS production environments at 99.9% uptime; lead GIS platforms (**ArcGIS Pro, ArcGIS Enterprise, QGIS, FME**); and deliver the maps, dashboards, and reporting tools (**Power BI, SQL, Python**) that planning teams and executives rely on. Proven record establishing **data standards, validation controls, and best practices** for technical data management, with high attention to detail and data accuracy.

CORE COMPETENCIES

Exploration & Geological Data Management	Enterprise Geodatabase Administration	Data Governance, Integrity & Security
Data Standards & Validation Controls	GIS Administration (ArcGIS Pro, QGIS)	Spatial ETL & Automation (Python, FME, SQL)
Dashboards & Reporting (Power BI, ArcGIS)	Field Data Capture (Survey123, GPS/GNSS)	
Drilling-Support Mapping & GPS/GNSS Surveys	Data QA & Topology Validation	Stakeholder Coordination
Team Leadership & Training		

PROFESSIONAL EXPERIENCE

GIS Coordinator

Nov 2017 – Present

Ikeja Electric • Lagos • Nigeria's largest electricity distributor

- ▶ Own the **integrity, security, and accessibility** of the enterprise geospatial database underpinning a 3,800+ km distribution network serving 1M+ customers — setting the **data standards, automated validation rules, and QA workflows** that safeguard data accuracy across 23 spatial data layers.
- ▶ Administer the PostGIS-backed asset-management platform used as the single source of truth for **20,000+ assets**, with role-based access control and single sign-on protecting sensitive operational data.
- ▶ Engineered spatial ETL pipelines (Python/ArcPy, GeoPandas, FME) that integrate SCADA, billing, and field-capture data with automated validation — eliminating **67%** of manual data-processing effort.
- ▶ Deliver the **maps, dashboards, and reporting tools** (ArcGIS Dashboards, Power BI) used by executives and planning teams; real-time outage dashboards cut mean incident-response time by **40%**.
- ▶ Rolled out digital **field data capture** with Esri Survey123 across 8,500+ inspections — 45% faster collection, with paper-based transcription errors eliminated at source.
- ▶ Compile, validate, and deliver datasets and reporting packages for management, planning, and field teams.

GIS / Data Engineering Manager

Sep 2016 – Oct 2017

PoloSoft Technologies • Lagos, Nigeria

- ▶ Directed a team of 8 GIS professionals across concurrent Agile project streams, delivering geospatial solutions on schedule for utility and infrastructure clients across West Africa.
- ▶ Architected Tableau and Power BI integrations that let client stakeholders analyze spatial data alongside operational metrics for faster decisions.
- ▶ Designed cloud-based ETL pipelines that scaled large-volume geospatial data processing and warehousing for enterprise clients.
- ▶ Built team capability through structured training in GIS technologies and database management, raising delivery quality.

GIS / Database Specialist

Oct 2012 – Aug 2016

SpatialMatrix Ltd • Lagos, Nigeria

- ▶ Migrated and administered enterprise PostgreSQL/PostGIS databases for oil & gas and infrastructure clients, sustaining **99.9% uptime** across mission-critical production environments.
- ▶ Optimized complex spatial SQL queries and indexing strategies, boosting database performance by **50%**.
- ▶ Delivered interactive dashboards, spatial analytics, cartographic production, and database architecture that turned raw geological and spatial data into decision-ready insight for oil & gas, NGO, and infrastructure clients.

Geologist

Jun 2010 – Aug 2012

Earth-Source Hydrocarbon • Nigeria

- ▶ Led geological field surveys and GPS-based data collection for hydrocarbon exploration, producing validated datasets that underpinned **resource estimation and prospect appraisal**.
- ▶ Produced structural and stratigraphic maps that guided **drilling-target selection** and reserve evaluation for exploration teams.
- ▶ Integrated geological field data into ArcGIS for spatial analysis and mapping of prospective zones, translating field observations into actionable datasets for **exploration and drilling teams**.

GIS Technician

Jan 2005 – May 2010

Spatial Technologies Limited • Nigeria

- ▶ Built and maintained ETL pipelines for spatial data ingestion, transformation, and quality assurance, delivering analysis-ready datasets to project teams.
- ▶ Managed GPS/GNSS field data-collection campaigns and post-processing for large-scale mapping; supported geodatabase maintenance, data migration, and topology validation.
- ▶ Performed network, proximity, and spatial-modelling analyses that informed planning across telecom and infrastructure projects.

EDUCATION

Master's Degree, Geographic Information Systems — University of Lagos, Nigeria

Bachelor of Technology (B.Tech), Geology — Federal University of Technology, Owerri, Nigeria

TECHNICAL SKILLS

GIS & Geospatial	ArcGIS Pro, ArcGIS Enterprise, ArcGIS Online, QGIS, ArcSDE, Survey123, FME (Safe Software), Google Earth Engine, Remote Sensing & LiDAR, GPS/GNSS data capture & post-processing
Databases	PostgreSQL/PostGIS, SQL Server, Oracle Spatial — administration, security & access control, performance tuning, migration
SQL & Scripting	SQL, Python (ArcPy, GeoPandas, PyQGIS, Pandas, Shapely), R — workflow automation, data validation, geoprocessing
Reporting & BI	Power BI, Tableau, Microsoft 365, advanced Excel (Power Query, Power Pivot, VBA), ArcGIS Dashboards
Cloud & DevOps	AWS (S3, EC2, RDS), Git/GitHub, Docker, CI/CD (GitHub Actions)
Web Mapping	React, Next.js, TypeScript, REST APIs, Leaflet.js — internal web-map data products

CERTIFICATIONS

Big Data Analysis, Power Query, Power Pivot & VBA (UrBizEdge, 2022) • Python & SQL for Data Science, Tableau for Data Visualization (Edureka, 2024) • GISP — in progress (GISCI)
